## **Suntec Singapore Announces the Return of JEC Composites 2011**

**Singapore, 15 December 2010** – Come 2011, Suntec Singapore will be the focal point yet again for one of the world's foremost events for composite materials promotion - JEC Composites Asia trade show and I.I.C.S (the Innovative International Composites Summit). The show will return to Suntec Singapore for the fourth consecutive year.

Hailed as the leading composites platform in the Asia Pacific region, JEC Asia is organised by JEC - the largest composites industry organisation in the world. The exhibition brings together leading players and professionals dedicated to composites. It provides a comprehensive overview of the value chain, from raw-material producers to processors and from processors to users. The JEC network connects more than 250,000 professionals worldwide from 96 different countries.

"We are delighted that JEC Composites has chosen Suntec Singapore once again for their event in 2011. The JEC Composites Show in Asia has been a key event in Suntec Singapore's calendar since 2008. Over the past years, the event has become one of the fastest-growing and most successful shows in Singapore - bringing new and innovative solutions to the composite field while allowing leading industry players to showcase their cutting-edge technologies, right here at Asia's leading venue," says Pieter Idenburg.

With the composites market in Asia expected to more than double by 2015<sup>1</sup> and make up about half of global consumption, coupled with the rapid growth in the Middle East, the event has achieved steadfast growth, strong expansion and increasing visitorship.

“We will conduct JEC Asia in Suntec for the fourth year. JEC has been strengthening its position in Asia, thanks to the high quality of its knowledge and networking products. Also we are able to deliver the best venue services with Suntec, a well-established brand with excellent reputation. We wish that our cooperation will bring even more outstanding services to JEC’s customers in 2011 and why not, new ones,” says Frédérique Mutel, JEC Group President & CEO.

This year, the show witnessed a 10 percent increase in exhibition space over 2009. It was attended by 7,010 visitors and attracted close to 350 exhibitors. It also showcased several conferences, technical and economical forums, workshops and business meetings that highlighted technologies and manufacturing processes and market applications. In the parallel event I.I.C.S, international experts presented more than 100 papers.

Its next edition will take place at Suntec Singapore from 18 – 20 October 2011.

-End-
